## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 8, 2009 has been entered.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3, 17-26 and 29-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-3, 17-26 and 29-30 are indefinite as to the expression "non-interfering substituents". Such phrase fails to set forth the intended substituents. Claims 1-3, 17-26 and 29-30 are also indefinite as to the term "peptide derivative". The term derivative is indefinite because it is unclear how far one can deviate from the parent compound without the derivative being so far removed therefrom as to be completely different compound.

### ***Claim Rejections - 35 USC § 102***

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent

granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 3, 17, 18, 2 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Clarkson, Jr. et al.

Clarkson Jr. et al. teach the use of genistin for the treatment of Alzheimer's disease. See the abstract and claims 1-90. The above reference makes clear that the claimed isoflavones have been previously used for the treatment of Alzheimer's disease.
